## Long-lasting opinions on physics and physics education in the Czech Republic

*Thursday 29 August 2024 12:50 (10 minutes)*

The aim of this contribution is to showcase the results of a nation-wide survey conducted in the Czech Republic on general public regarding the long-lasting opinions on physics and physics education originating mainly in lower secondary school and high school physics classrooms in collaboration with the Institute of Sociology. The results of this survey aim to support the modern ideology of focusing more on conceptual understanding and inquiry-based approach to physics education rather than traditional methods focused on formulae and constant memorization.

### How would you like to present your contribution?

Live in Kraków (time slot to be allotted based on the programme)

### Target education level

General

### Category

Formal Education
