First look at data

- Moriond 2022 dataset $\sim 190\text{fb}/1$ skimmed with TDCPV_qqs
- MC14_ri generic $1/\text{ab}$
- $\sim 2\text{M}$ $B_d \rightarrow \text{Phi} K_s$ centrally produced MC events (not shown here)
- I will re-run the pre-selection and BDT with these datasets
