

# Workshop Sessions

- Split for 2h in two rooms
- Get concrete work done:
  - Collect ideas in written form
  - Converge on Blueprint chapters
    - We are short in time!
- Document in the final form/content in ~4weeks
  - Updated executive summary to be submitted to SPC for information

# Preservation Fabrics

Convenors: Yves, Tina, Dave, Homer

Task: Two ongoing projects: SLAC/DESY => explore/compare in more details

Sketch a proposal for a common platform integrating DESY/SLAC activities with the aim of providing solutions for other experiments (urgency: LEP, JADE, then Belle, CLEO etc.) and integrating constraints from (flexibility for) Tevatron (further) action

Explore relation with LHC computing, must be exposed in some form in the publication.

Text: 2/3 pages, estimate timelines, costs organization

# Physics case, Models, Documentation, outreach

- Convenors: Salvatore, Travis, Siggi, Francois
- Tasks:
- Case
  - Review the chapter, what is missing? LHC physics case?
  - Who is writing?
- Models(30 min):
  - work on the experiments models chapter, add general considerations chapter
  - Discuss analysis preservation (is this new?) mention recast
  - LHC section
- Documentation(30 min):
  - Explore/develop Inspire sub-chapter
- Outreach (30 min)
  - Interfaces, concrete proposals/example, collaborations, costs
  - Common formats, with LHC?
