C1PL1-01: Airbus: A discussion about the use of cryogenic hydrogen for aviation propulsion

Monday 10 July 2023 08:05 (45 minutes)

Airbus has declared its intent to have a clean sheet hydrogen powered airliner in commercial service by 2035. Ms. Simpson will address the challenges associated with incorporating cryogenics into an aircraft and share the progress of some of projects Airbus is pursuing to solve them.

Presenter: SIMPSON, Amanda (Airbus Americas, Inc)
