

STXS binnings for CP sensitivity (20'+10')

Monday 28 November 2022 11:00 (20 minutes)

The current Simplified Template Cross-Section (STXS) categorization leaves STXS analyses insensitive to CP-odd contributions in Higgs boson production, which are predicted by several models beyond the Standard Model. This presentation proposes to categorize events with two jets additionally via the $d\Phi_{Hjj}$ observable to make future Run 2+3 analyses sensitive to CP violation. The feasibility of such a splitting based on our present sensitivity is also discussed

Presenter: WINTER, Benedict Tobias (Albert Ludwigs Universitaet Freiburg (DE))

Session Classification: WG2 Higgs Properties Parallel
