

HEPscore in the accounting system: Operational Strategy

Tuesday 20 September 2022 09:05 (25 minutes)

- what is the deployment plan of a new benchmark?
- how sites should contribute?
- what is the possible time scale (months, years)
- how the pledges and procurement should then start to include HEPscore (in parallel to HS06 at first, to then gradually replace it)
- What are the validation procedures foreseen in these phases?
- how often a benchmark should/could be changed? every 4-5 years (at each LS?)

Presenters: ANDREEVA, Julia (CERN); LITMAATH, Maarten (CERN)

Session Classification: Strategy to deploy HEPscore
