HEPscore in the accounting system: Operational Strategy

Tuesday 20 September 2022 09:05 (25 minutes)

- what is the deployment plan of a new benchmark?
- how sites should contribute?
- what is the possible time scale (months, years)
- how the pledges and procurement should then start to include HEPscore (in parallel to HS06 at first, to then gradually replace it)
- What are the validation procedures foreseen in these phases?
- how often a benchmark should/could be changed? every 4-5 years (at each LS?)

Round table: HEPscore22 and adoption process

Tuesday 20 September 2022 09:55 (40 minutes)

On the basis of what has been presented in the workshop, gather the feedback of the participants about:

- the HEP workload mix that better satisfies the WLCG requirements (representativeness, runtime duration, size)
- the operational process for HEPscore adoption in the Accounting system (timescale, validation, frequency of future upgrades, ...)
