

# Technical Assignment 3

PHY410: Do problems 1 and 2

PHY 505: Do all three problems.

**Time to get fancier! The problems are jupyter notebooks named “Problem1”, “Problem2”, and “Problem3”.**

Accept the assignment from github classroom:<https://classroom.github.com/a/PSFJPWc3>. You will then get a link to your own github area.

You should submit your code through github classroom. Submit your code via GitHub classrooms as usual, and your writeup as a PDF or html copy of your jupyter notebooks on UBLearn.

**Carefully follow the directions in the README of the module you cloned!**
