

EPICS Collaboration Meeting September 2022

Contribution ID: 25 Contribution code: STAT

Type: Talk

Status of ITER

Wednesday, September 21, 2022 11:00 AM (20 minutes)

The ITER project is in full construction with more and more support systems in commissioning and 24/7 operation. The EPICS based control system is about 15% complete towards first plasma considering energized instrumentation and control racks or integrated process variables.

In this talk we report on the current status of the ITER project with emphasize on the integration, commissioning and operation of in-kind deliverables. We also outline the plan for the coming years.
