Data Science Corps: Modernizing Water & Wastewater Treatment through Data Science Education and Research (MoWaTER)

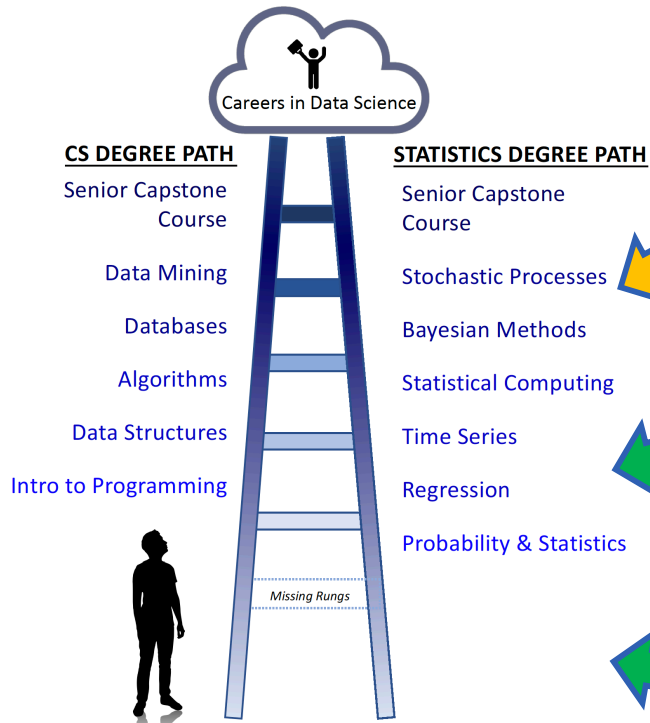

Amanda (Mandy) Hering

PI and Director

Professor

Baylor University

Why W/WWT?

The W/WWT industry has an abundance of data with the dual benefits of providing tractable problems for beginners to solve and having the potential for immediate improvement in water quality and quantity.

Careers in Data Science

CS DEGREE PATH

Senior Capstone Course

Data Mining

Databases

Algorithms

Data Structures

Intro to Programming

STATISTICS DEGREE PATH

Senior Capstone Course

Stochastic Processes

Bayesian Methods

Statistical Computing

Time Series

Regression

Probability & Statistics

Missing Rungs

MoWaTER PRO Short Course for Professionals

1-week Data Science Workshop

Advanced 8-week Summer Internship

5-week Summer Data Science Fellows Program

Introduction to Data Science course

Careers in Environmental Engineering

Education Publications:

1. Course development and evaluation over 3 years
2. Textbook aggregating our course notes, class exercises, & exams
3. Summer research program structure and evaluation over 3 years
4. Data pipeline: acquisition, wrangling, and archiving
5. Lessons learned regarding the nuts and bolts of multi-university teaching
6. Student evaluation through self-written letters of recommendation
