

Recent BABAR Charm Physics Results

Thursday 23 June 2011 15:20 (20 minutes)

We report recent BABAR charm physics results, including CP violation studies in $D^{+-} \rightarrow K_S^0 \pi^+$ and $D^+ \rightarrow K_S^0 h^+ h^-$, a study of the Dalitz plot of $D_s^{+-} \rightarrow K^+ K^- \pi^+$, measurements of the mass and width of the $D_{s1}(2536)^+$ and measurements of charm semileptonic decays. We also describe a recent study of inclusive $D^{(*)} \pi$ production in $c\bar{c}$ continuum.
