[https://indico.cern.ch/event/1178240/contributions/4949679/attachments/2474950/4246988/220705\\_ADCoS.pdf](https://indico.cern.ch/event/1178240/contributions/4949679/attachments/2474950/4246988/220705_ADCoS.pdf) (Armen - ADCoS Weekly)

General news / issues during the past week:

7/4: ADC Technical Coordination Board:

No meeting this week.

7/5: ADC Weekly meeting:

<https://indico.cern.ch/e/1168437>

Ops Round Table:

- NTR

'AOB' summary:

- 13.6 TeV collisions starting [right now!](#)

=====

Site-specific issues:

6/29: AGLT2 - squid service degraded (node: sl-um-es5.slateci.io). The problem with the machine was fixed the next day - see ticket for details.

[https://ggus.eu/?mode=ticket\\_info&ticket\\_id=157919](https://ggus.eu/?mode=ticket_info&ticket_id=157919) was closed.

<https://atlas-adc-elisa.cern.ch/elisa/display/4943?logbook=ADC>.

6/30: NET2 - [https://ggus.eu/index.php?mode=ticket\\_info&ticket\\_id=157861](https://ggus.eu/index.php?mode=ticket_info&ticket_id=157861) was re-opened, as the number of running jobs dropped by a large fraction. The new CE noted earlier in the ticket thread was only working for the ANALY queue, hence the large reduction in running jobs. Fixed a configuration setting in CRIC. As of 7/1 the issue had been resolved, so ggus 157861 was again closed.

7/2: AGLT2 - squid service degraded (node: sl-um-es5.slateci.io). Two issues - details in the ticket - both resolved as of 7/4.

[https://ggus.eu/index.php?mode=ticket\\_info&ticket\\_id=157937](https://ggus.eu/index.php?mode=ticket_info&ticket_id=157937) was closed that day. <https://atlas-adc-elisa.cern.ch/elisa/display/4959?logbook=ADC>.

7/5: AGLT2 - squid service degraded (node: sl-um-es5.slateci.io). There was a problem with port 3401 on the machine. The kubelet instance for the squid server was re-started. Issue resolved, so [https://ggus.eu/index.php?mode=ticket\\_info&ticket\\_id=157963](https://ggus.eu/index.php?mode=ticket_info&ticket_id=157963) was closed on 7/6.  
<https://atlas-adc-elisa.cern.ch/elisa/display/4973?logbook=ADC>.
