

Discussion

Tuesday 5 April 2011 16:45 (50 minutes)

- Algorithms and cone sizes
- jet calibration procedures and systematics
- Large angle FSR photons and jet/lepton overlap removal. Leptons, neutrinos, FSR photons included or not in jet definition?
- Make a list of possible additional measurements, of interest for EW physics or PDF determinations. For example:
 - W+charm
 - gamma + charm
 - Z + b

Session Classification: A_FB, sin2thetaW, W+jets, and more
