## **Science**

The intellectual and practical activity encompassing the systematic study of the structure and behaviour of the world through observation and experiment.

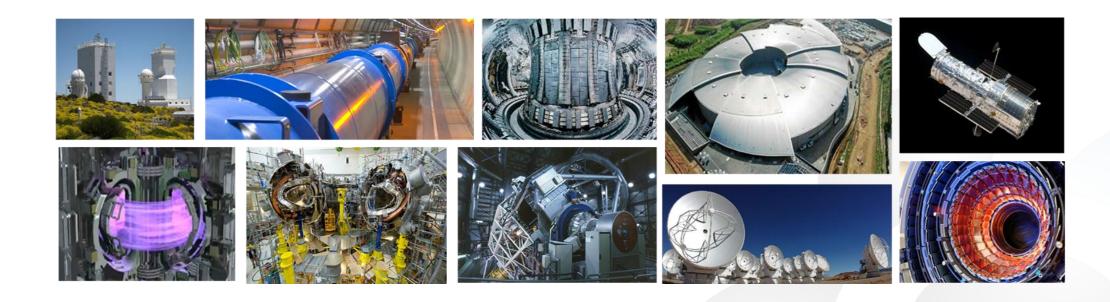

SCIENCE INDUSTRY is the economic sector which includes the companies devoted to the design, engineering, construction, updating and keeping of scientific research facilities, its equipment and other related instruments

Atociación Española de la Industria de la Ciencia

- In the Edge of the Technology
- Public-Private Collaboration
- High Added Value
- Mostly International (>90 %)
- Highly Competitive

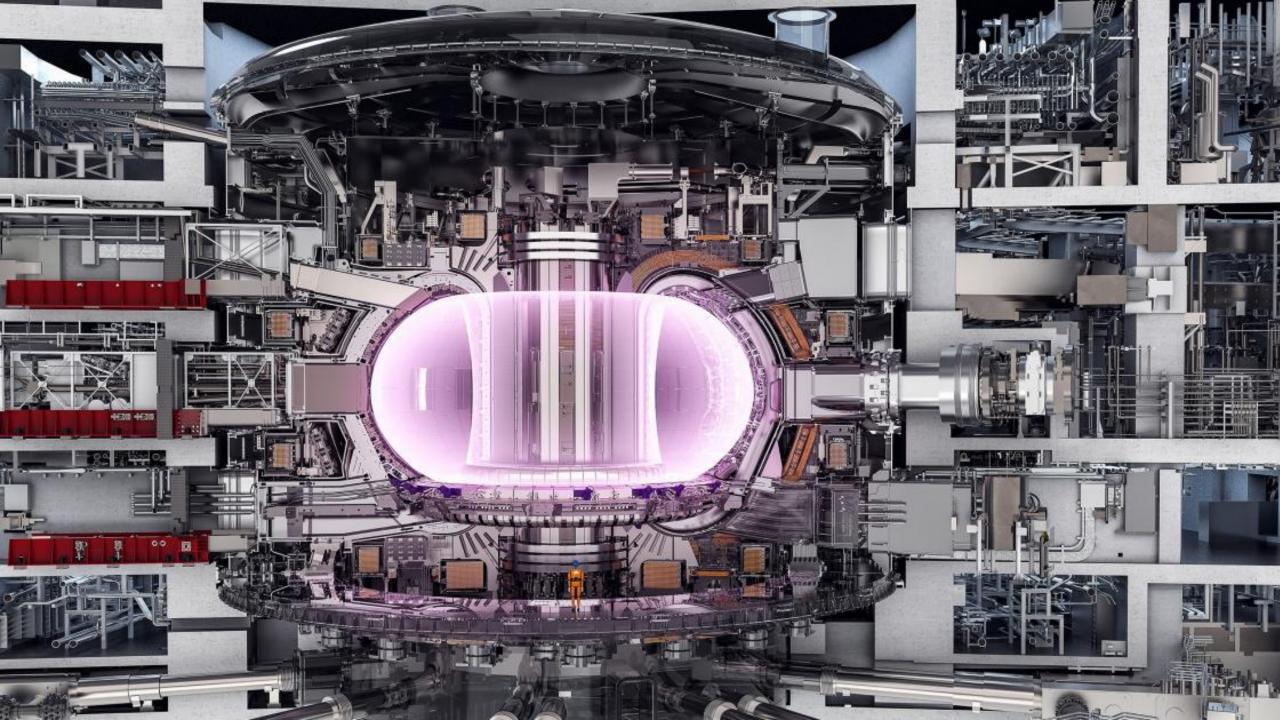

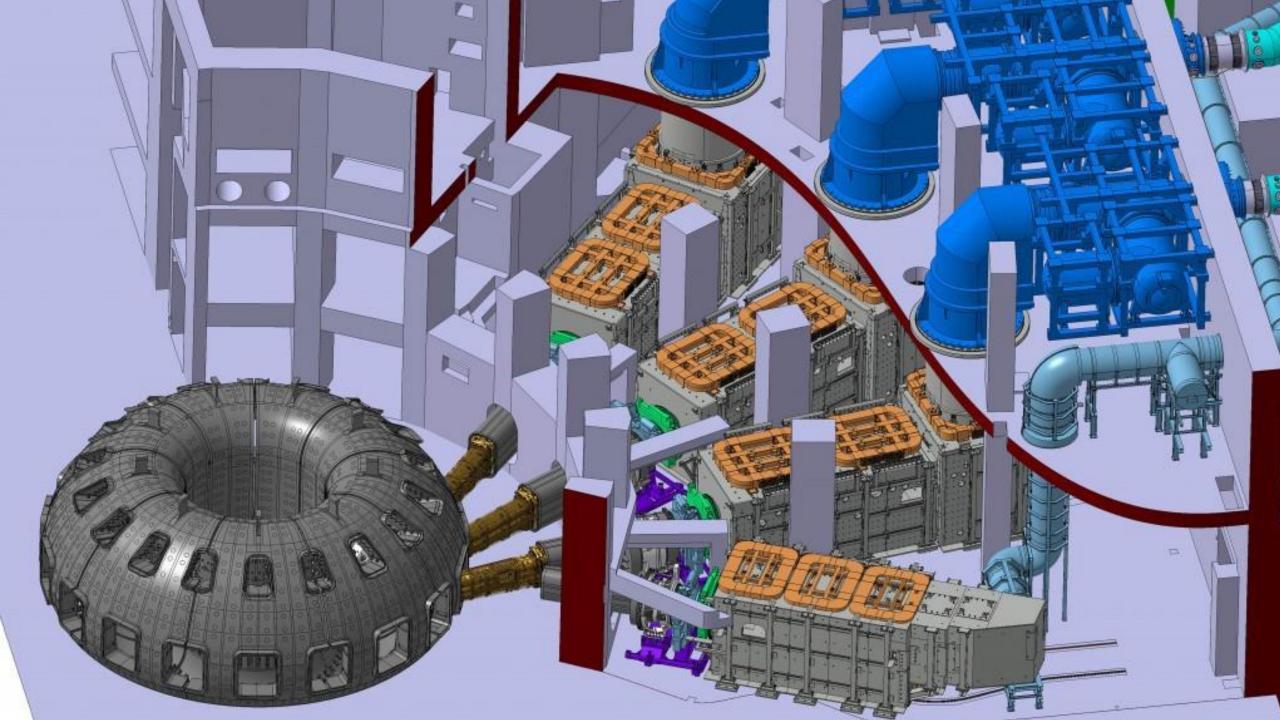

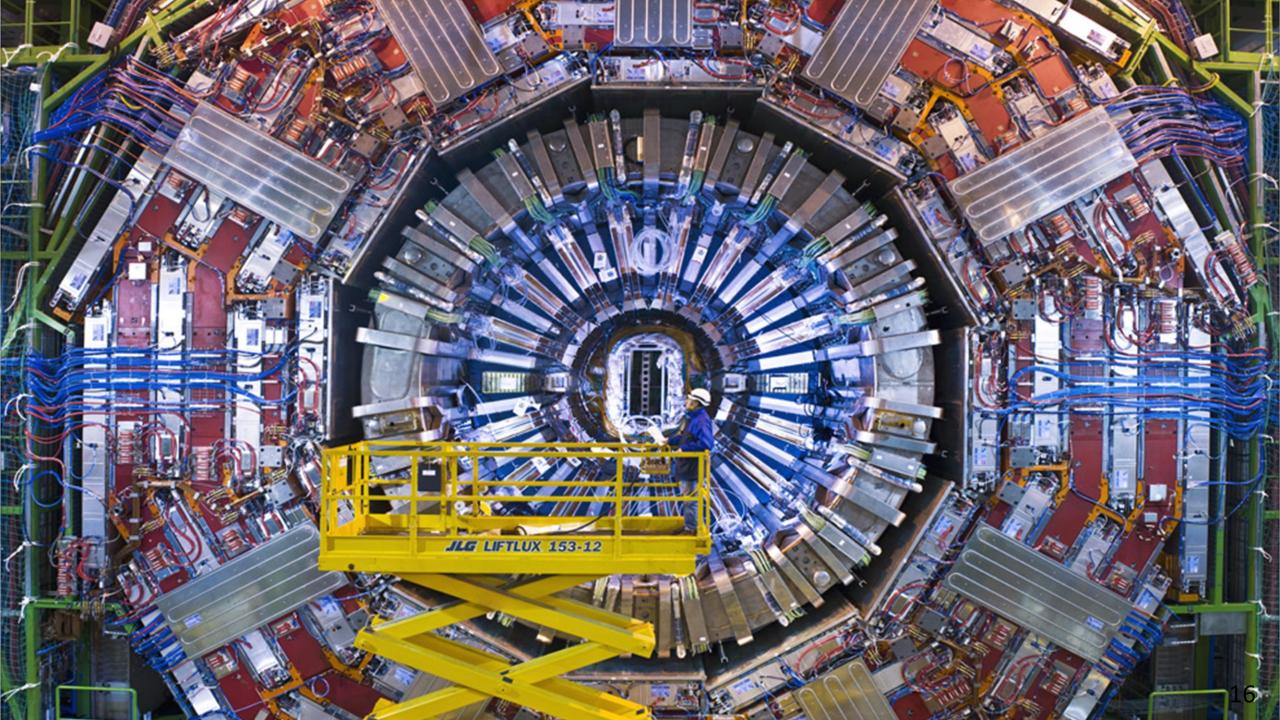

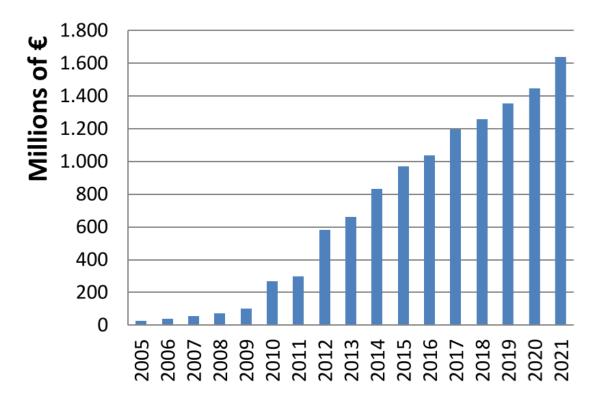

#### Medium-long term vision and COLLABORATION

# Accumulated industrial Return in Large Scientific Facilities - Astronomy, Particle Physics and Fusion

#### RETURN ON INVESTMENT OF THE PARTICIPATION TO ESS, LUND. CONTRACTS AWARDED TO SPANISH INDUSTRY

#### **CONCLUSIONES**

 Spain in a reference country in Science Industry: COMPETITIVE AND TECHNOLOGICAL

 We are organized and dealing with the most challenging projects in Science around the world

 We need challenges, collaboration and opportunities (not for the Industry but for the industry-academia Tandem)

# THANK YOU FOR YOUR ATTENTION!
