(I) The post covid gap: Are students different after covid restrictions and on-line learning?

Monday 19 June 2023 10:45 (30 minutes)

The impact of the coronavirus disease of 2019 (COVID-19) on secondary education continues to disrupt and profoundly affect student learning and success at post-secondary institutions. Many university instructors have noted and reported that there has emerged a significant gap between course instructor expectations and students' abilities for pandemic cohorts of students. Urgent consideration must be given as to how best to support these and similarly affected incoming cohorts of undergraduate students. This talk examines and proposes resources to support instructors on how to teach students post covid and invites discussion and suggestions on the way forward.

Keyword-1

covid impact

Keyword-2

student support
