Open Discussion: Science Publishing in Canada

Monday 19 June 2023 12:15 (1 hour)

Canadian Science Publishing welcomes all CAP attendees for a discussion about the future of science publishing and how publishing serves the research community. CSP will present a brief outlook on the changes within publishing companies (including our own not-for-profit structure) as well as the future of scientific publishing with particular focus on Open Access and Open Science. We will present for discussion models of agreements that make it possible for OA to be financially feasible for today's researchers, and welcome feedback on how the Canadian Journal of Physics can better serve the physics research community. The second half of the session will be open for community discussion with representatives from CSP as well as the Editors in Chief of the Canadian Journal of Physics, Profs. Robert Mann and Marco Merkli.

Session Classification: (M-WOAP) Workshop on Open Access Publishing | Atelier sur la publication en libre accès
