

## Daily News Thursday 25<sup>th</sup> May

### Today's Events

14:00 - Public lecture by John Ellis at the National Museum of Serbia

*"Experiments with the Large Hadron Collider at CERN can cast light on many fundamental problems in cosmology, such as the structure of the visible matter in the Universe and its origin, the nature of dark matter, and the future of the Universe. A key role in these studies is played by the Higgs boson, a unique and mysterious particle that has yet to reveal its secrets."*

19:30 - Conference photo

*Just before the rakija & vino tasting. If weather is good - photo will be in the hotel park (next to the terrace). If the weather is not on our side the photo will taken in the hotel.*

19:30 - Rakija & vino tasting

*A possibility for Serbian "rakija & wine" degustation and possibility to buy the bottle of rakija and/or wine. (It should be possible to pay by card).*

---

### Fun fact

One of the many peculiar and quirky traditions of Belgrade that is rarely known is that during the early 19th century the Slavija square had been a famous hunting ground. The property was bought in 1878 and owned by a Scotsman called Francis MacKenzie. The locals used to gather here and go hunting for wild ducks. (<https://www.serbia.com>)
