Measurements of Higgs boson properties (mass, width, and Spin/CP) with the ATLAS detector

Friday, July 14, 2023 9:30 AM (30 minutes)

This talk presents precise measurement of the properties of the Higgs boson, including its mass, total width, spin, and CP quantum number. The measurements are performed in various Higgs boson production and decay modes, as well as their combinations. Observation of deviations between these measurements and Standard Model (SM) predictions would be a sign of possible new phenomena beyond the SM

Is this abstract from experiment?

Yes

Name of experiment and experimental site

ATLAS

Is the speaker for that presentation defined?

No

Details

N/A

Internet talk

Maybe

Author: PETERS, Krisztian (Deutsches Elektronen-Synchrotron (DE))

Co-author: LEONE, Sandra (Universita & INFN Pisa (IT))

Presenter: LEONE, Sandra (Universita & INFN Pisa (IT))

Session Classification: High Energy Particle Physics

Track Classification: Main topics: High Energy Particle Physics
