Status and perspective of ICARUS at the Fermilab Short-Baseline Neutrino Program

Thursday, July 13, 2023 12:15 PM (25 minutes)

The ICARUS collaboration has employed the 760-tonne T600 detector in a successful three-year physics run at the underground LNGS laboratory, performing a sensitive search for LSND-like anomalous ν_e appearance in the CERN Neutrino to Gran Sasso beam. This helped constraining the allowed neutrino oscillation parameters to a narrow region around 1 eV^2 . After a significant overhaul at CERN, the T600 detector has been installed at Fermilab. In 2020 the cryogenic commissioning began with detector cool down, liquid argon filling and recirculation. ICARUS then started its operation collecting the first neutrino events from the Booster Neutrino Beam (BNB) and the Neutrinos at the Main Injector (NuMI) beam off-axis, which were used to test the ICARUS event selection, reconstruction and analysis algorithms. ICARUS successfully completed its commissioning phase in June 2022, and started data taking for neutrino oscillation physics, aiming at first to either confirm or refute the claim by Neutrino-4 short-baseline reactor experiment. ICARUS will also perform measurements of neutrino cross sections with the NuMI beam and several Beyond Standard Model searches. After the first year of operations, ICARUS will jointly search for evidence of sterile neutrinos with the Short-Baseline Near Detector (SBND), within the Fermilab Short-Baseline Neutrino (SBN) program. In this presentation, preliminary technical results from the ICARUS data with the BNB and NuMI beams are presented both in terms of performance of all ICARUS subsystems and its capability to select and reconstruct neutrino events.

Is this abstract from experiment?

Yes

Name of experiment and experimental site

ICARUS, Fermilab

Is the speaker for that presentation defined?

Yes

Details

Alice Campani on behalf of the ICARUS Collaboration, Università di Genova - INFN Sezione di Genova, Italy,
<https://www.difi.unige.it>

Internet talk

No

Author: CAMPANI, Alice

Presenter: CAMPANI, Alice

Session Classification: Cosmology, Astrophysics, Gravity, Mathematical Physics

Track Classification: Main topics: Cosmology, Astrophysics, Gravity, Mathematical Physics
