Announcing the detection of neutrino emission from the Galactic Plane

Wednesday 30 August 2023 14:30 (15 minutes)

On June 29, a webinar was held by the IceCube Collaboration to announce the detection of the Galactic Plane in neutrinos. The leading institutions were in the US and in Germany. This is the perspective of the German institution TU Dortmund University on the preparation of the event including the production of online material, the preparation of the press conference and lessons-learned from the webinar.

Submitted on behalf of a Collaboration?
