IMPRS on Gravitational Wave Astronomy

Monday 28 August 2023 20:59 (1 minute)

I will introduce our structured doctoral program, the International Max Planck Research School on Gravitational Wave Astronomy. Since its start in 2006 more than 160 PhD students graduated from our school. I will give an overview of our curriculum and how our early career researchers learn from each other with topics ranging from theory to experiments in gravitational wave astronomy. The whereabouts of those who graduated with a doctor's degree is also shown.
