Combined Higgs boson measurements and their interpretations with the ATLAS experiment

Tuesday, 28 March 2023 09:20 (20 minutes)

Combining measurements of many production and decay channels of the observed Higgs boson allows for the highest possible measurement precision for the properties of the Higgs boson and its interactions. These combined measurements are interpreted in various ways; specific scenarios of physics beyond the Standard Model are tested, as well as a generic extension in the framework of the Standard Model Effective Field Theory. The latest highlight results of these measurements and their interpretations performed by the ATLAS Collaboration will be discussed.

Submitted on behalf of a Collaboration?

Yes

Participate in poster competition?

No

Primary author: ESCALIER, Marc (IJCLab-Orsay)

Presenter: ESCALIER, Marc (IJCLab-Orsay)

Session Classification: WG3

Track Classification: WG3: Electroweak Physics and Beyond the Standard Model
