# How to DIS

## § Network with other attendees

- ☞ Conferences are a great opportunity to meet new people and build relationships with people in your field. Take advantage of this opportunity by networking with other attendees.

## § Attend presentations and workshops

- ☞ Conferences are a great way to learn new things and improve your skills. Make sure to attend as many presentations and workshops as you can.

## § Ask questions

- ☞ If you have any questions, don't be afraid to ask them. The speakers and other attendees will be happy to help you.

# How to DIS

## § Take notes

- It's important to take notes during the conference so that you can remember what you learned. You can also use your notes to help you to write a blog post or an article about the conference.

## § Follow up with the speakers

- After the conference, be sure to follow up with the speakers you were interested in. This will show them that you were interested in their presentation and that you value their time.

## § Share your knowledge

- After the conference, share your knowledge with others. You can do this by writing a blog post, giving a presentation, or teaching a class.

Enjoy the rest of your stay and have a great conference!
