

Electronics for Particle Physics in Austria

Monday 26 September 2011 15:30 (30 minutes)

There are a couple of institutes in Austria dealing with particle physics in various aspects, and most of them also have R&D programs for instrumentation. These institutes belong to universities or the Austrian Academy of Sciences, and the field of research ranges from astroparticle physics to nuclear physics. This presentation will give a brief overview of the institutes and their electronics developments in particular.

Presenter: JEITLER, Manfred (Institut fuer Hochenergiephysik (HEPHY)-Oesterreichische Akadem)

Session Classification: Opening 1

Track Classification: Systems
