

Semiconductor Manufacturing in Austria

Monday 26 September 2011 17:15 (45 minutes)

Austriamicrosystems as a globally acting, specialty semiconductor manufacturer with headquarters in Unterpremstätten, Austria, is a nucleation point for a lot of leading edge research in the semiconductor field. With its foundry services and “all-under-one-roof” offers, the company has a long history in providing open access to specialty analog semiconductor processes for the past 3 decades. The presentation is showcasing the companies capabilities, services and contributions to the scientific community, and gives an outlook to future new technologies under development.

Presenter: Dr MINIXHOFER, Rainer (Austriamicrosystems AG)

Session Classification: Opening 2
