Buildings taking care of humans

The FYES system is the most complete and technologically advanced solution in today's electrical and mechanical installation of living spaces. It is designed in order to meet the needs of small and big residences, industrial buildings, offices, shops, hotels, public areas, production areas and other installations.

FYES unifies the control of conventional, electromechanical installations, security systems, communication and IT systems and provides convenience, energy savings and protection.

FYES Intelligent Buildings

The intelligent idea for any building

Technology at your service

FYES is a leader in building automation, with 28 years history in research and development activity. It manufactures innovative, high technology products, with considerable competitive advantages.

The company's products and software are designed with strict technical and quality standards. The customized solutions that are offered can meet every customer's needs.

Our mission is to develop automation technology for any business sector, offering a more efficient, comfortable, safe and economic operation to every workplace or living space.

COMPETITIVE ADVANTAGES

- Extensive Experience
- Impeccable Track Record
- High Expertise in Civil engineering, Electromechanic works, Constructions and PV installations
- Tailor Made Solutions for Buildings' Intelligence
- High Quality/Innovative Partners
- Effective and Cost Competitive

THANK YOU
