WHAT DO WE LEARN FROM THESE ANALYSES?

- *Exp searches consider 1HNL mixing to 1 flavor at a time*
- *They are sensitive to very large mixings*

DISCRIMINATE BETWEEN LOW-SCALE SEESAWS

Fernández-Martínez, XM, Naredo-Tuero [2209.04461]

SUMMARY

- *Colliders are good places to search for HNLs*
 - *LEP, LHC and more to come* —
- *LHC is already improving LEP*
- *Analyses are improving*
 - *trileptons, DV, OS dileptons* —
- *Still things to be improved*
 - *going beyond single mixing hypothesis* —
- *LNV signals still relevant for symmetry protected scenarios*
 - *help discriminating low-scale seesaws* —

Thank you!
