Seafile, what's new in the year 2022

Monday 6 March 2023 13:30 (30 minutes)

Seafile is a popular open-source file sync and share solution. The focus of Seafile is reliability, security and performance. It's widely used by many large educational institutes in Europe.

This talk will review the new features and improvements that we have made to Seafile in 2022. Topics include:
1. Performance improvements to the server
2. Improved user experience
3. New drive client for macOS
4. Progress on OCM support
