An unhappy end for S3

Wednesday 8 March 2023 09:00 (15 minutes)

Research Drive, the Dutch Sync & Share service based on ownCloud, uses OpenStack Swift S3 as its storage backend. Where the integration of S3 within the software is not that good, we will migrate back to a posix compliant file system, namely CephFS. But how to migrate almost 2 PB of data without too much downtime...
