Please fill your site info for our "site report survey summary".

Overview

Your name *

Email address *

Institution/Company *

Instance name of your on-premise sync&share service

16 answers received from:

- SURF
- CERN
- Max Planck Computing and Data Facility (MPCDF)
- University of Oslo
- Poznan Supercomputing and Networking Center
- CESNET a.l.e.
- Safespring
- Humboldt Uni zu Berlin
- Max-Planck Digital Library
- ETH Zuerich
- Westfälische Wilhelms-Universität Münster
- Nantes Université
- Technische Universität Wien
- CESNET
- Forschungszentrum Jülich on behalf of EUDAT CDI
- SWITCH

Thank you for your contribution!

Vendors

Sync&share software

Answered: 16

A. Nextcloud: 3 (18.75%)

B. Owncloud: 9 (56.25%)

C. Powerfolder: 0 (0.00%)

D. Pydio: 0 (0.00%)

E. Seafile: 3 (18.75%)

F. other (please specify below in "Additional comments"):
1 (6.25%)

Service role

Other roles, use-cases and comments

- *“I'd like to see questionnaires about config management, deployment strategies, testing and maybe even something like softer metrics like "how much headache are you having" and "how much friction do you experience in day to day operations”*
- *“collaborative tools”*
- *“Privacy is one of our main concerns and motivations, thus we can not use private equity clouds like those owned by evil megacorps”*
- *We deliver this service to Dutch educational and research institutes.*
- *Infrastructure*

Role of this service in your organization

Answered: 16

A. Administration workflows and processes (document handling, process support,...): 7 (10.00%)

B. General project collaboration (sharing of project data and documents in technical and engineering context): 13 (18.57%)

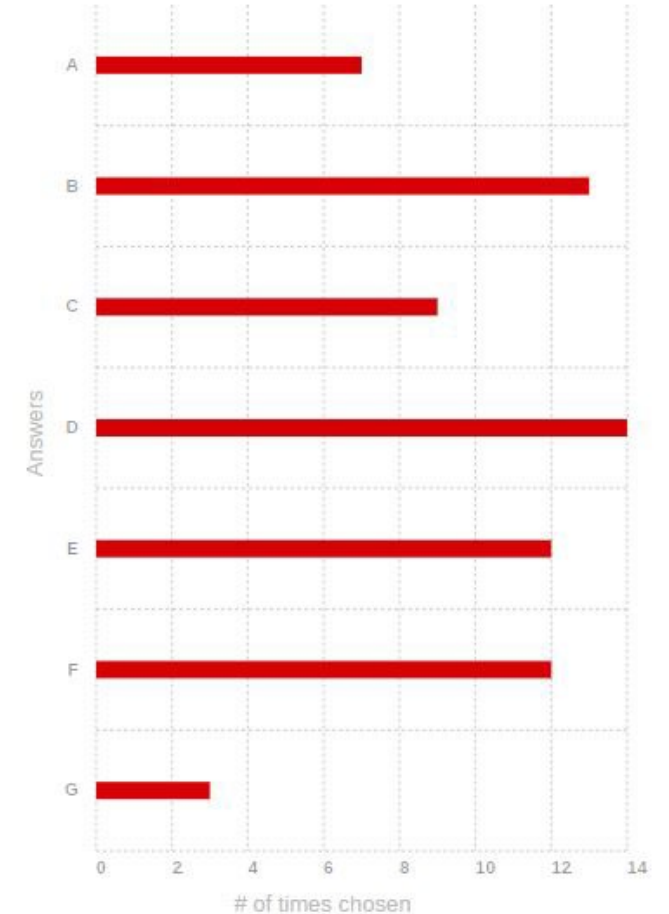

C. Data workflows (collection, access and sharing of datasets or files considered as "data" independently of their type): 9 (12.86%)

D. Research collaboration (sharing code, data and other files; integrated access to software, computing, analytics and similar resources): 14 (20.00%)

E. Education and outreach use-cases: 12 (17.14%)

F. Sharing and collaborating outside of organization and across other organizations: 12 (17.14%)

G. other (please specify below): 3 (4.29%)

Collaboration Software

Integrated software

Answered: 16

A. Collabora Online: 3 (16.67%)

B. OnlyOffice: 11 (61.11%)

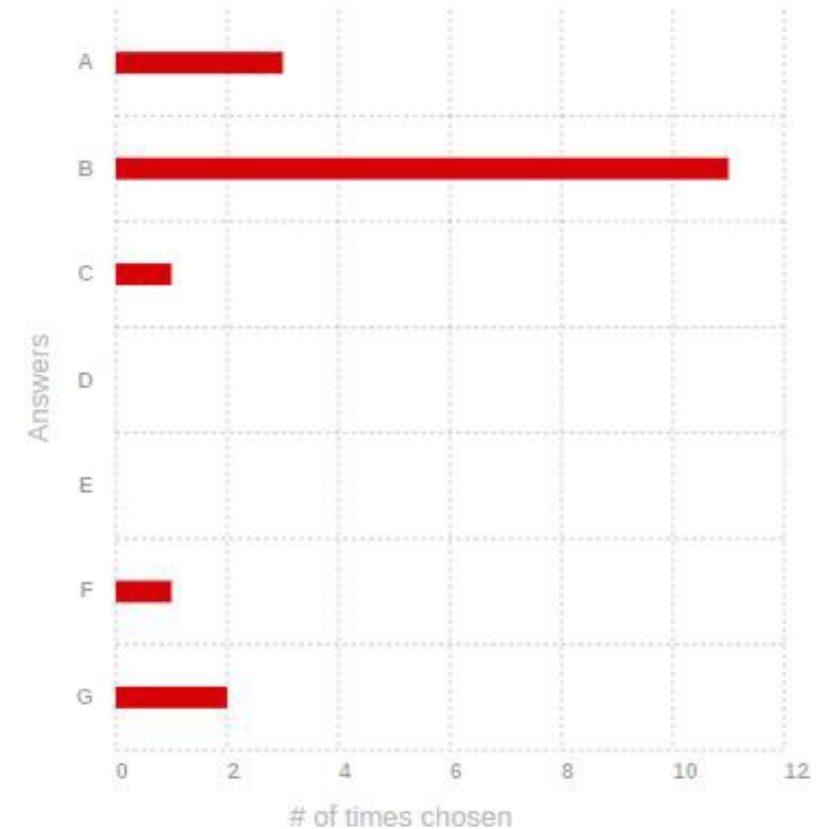

C. SWAN Jupyter Notebooks : 1 (5.56%)

D. Other Jupyter Notebooks : 0 (0.00%)

E. Kopano (email): 0 (0.00%)

F. Microsoft Office Online / Sharepoint: 1 (5.56%)

G. other (please specify in comment area): 2 (11.11%)

Federated Shares

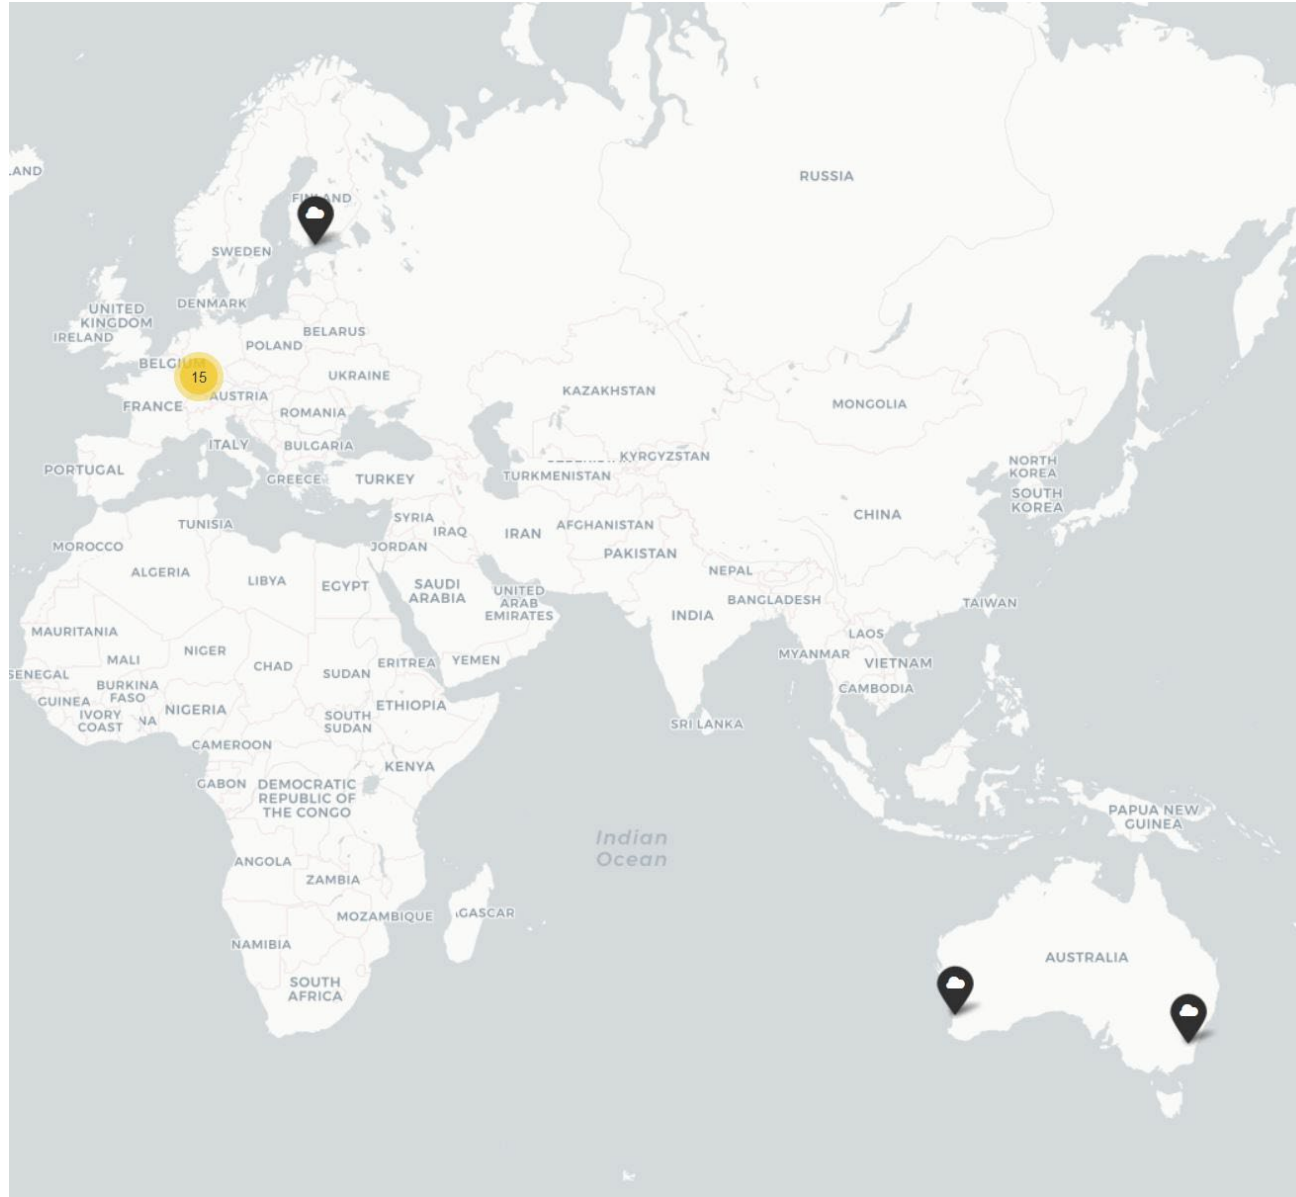

G. Other roles, use-cases and comments

- *“OneDrive and Google Workspaces are officially allowed to be used as well”*

feedbacks are welcome

Summary

- Installations since 2013 are reported
- Installations from more than 2500 users up to 230k users are running
- 600k user accounts have been reported within the CS3 community
- The average quota size is about 300 GB and 630 TB average storage provided
- 8.2 PB used sync and share storage within the CS3 community
- Upto 1 million public shares (anonymous links) are reported
- **PLEASE PARTICIPATE: <https://cs3map.ethz.ch>**

Site Reports until 17:15 pm

- 16:00 - 16:15
Hugo Gonzalez Labrador - *Standing innovation for 10 years: CERNBox*
- 16:15 - 16:30
Stefano Stalio - *Sync & Share self service provisioning on INFN Cloud*
- 16:30 - 16:45
Narges Zarrabi - *Research Drive, a platform for active research data management*
- 16:45 - 17:00
Gabriel Paues et al. - *Sunet Drive - An Academic EFSS Packaged for EOSC*
- 17:00 - 17:15
Marcel Wunderlich - *Sciebo Site Report: Challenges in supporting more than just the core project*

Now the site reports will follow:
Thank you for your attention.
