Recent Advances in Machine Learning for High Energy Physics

Wednesday 16 November 2022 12:20 (30 minutes)

Abstract: I will give a high-level overview of recent advances om machine learning for high energy physics, including developments in neural network architectures (e.g., graphs, transformers, and equivariant networks), generative modeling, anomaly detection, and fast inference.

Presenter: DUARTE, Javier Mauricio (Univ. of California San Diego (US))

Session Classification: Session I
