Nominations for ECFA country delegates

*“Plenary ECFA appoints members for a **total maximum period of six years after nomination** by their country. While the members so chosen should be able to represent the views of the high-energy physics community of their country, they are members of Plenary ECFA as individuals.”*

- New appointments and re-appointments for a second term are made each year at the Plenary ECFA meeting in November, with start of mandate on 1st January of the following year*

A warm Welcome to all new members

Huge Thanks to the outgoing members for their excellent work and engagement
for ECFA

New members of the ECR Panel

From the ECR mandate:

“Members are, in general, PhD students and postdocs, either with a non-permanent contract or with up to eight years after obtaining the PhD. Up to three members, among them at least one PhD student and one postdoc, can be nominated by each ECFA country and each major laboratory represented in ECFA for a mandate of two years, extendable for another two years. Nominations are to be endorsed by Plenary ECFA. Members act as individuals, but should be able to represent the views of early-career researchers in particle physics in the nominating country.”

Since the **lab composition of ECFA has changed** (major labs are represented via LDG, except CERN) the ECR Panel composition should reflect this.

In Nov. 2021 PECFA it was decided that:

- *Present members from DESY and Frascati should be “phased out” (at end of their mandate)*
- *Countries with a Major Lab in LDG are allowed to add a fourth member (at least one from the Lab)*
(Labs in LDG, in addition to CERN: CIEMAT, DESY, IRFU, IJCLAB, Nikhef, LNF, LNGS, PSI, STFC-RAL)
- *CERN’s representation in the ECR Panel will be kept (3 members, CERN is full ECFA member)*
