

## Session Program

3-8 Sept 2023

**Low-x 2023**

***Low x, BFKL, saturation***

Leros island, Greece  
Crithoni's Paradise 4\* Hotel

## Tuesday 5 September

09:00

### Low x, BFKL, saturation

**Session** | **Location:** Leros island, Greece, Crithoni's Paradise 4\* Hotel

09:00–09:30

#### Probing gluon saturation with diffractive jets in photon-nucleus interactions

##### Speaker

Edmond Iancu

09:30–10:00

#### Back-to-back dijets at the EIC: small x and Sudakov resummation

##### Speakers

Tomasz Stebel, Tomasz Stebel

10:00–10:30

#### Gluon contributions to DVCS, TCS and DDVCS from low to moderate x

##### Speaker

Renaud BOUSSARIE

10:30

11:00

### Low x, BFKL, saturation

**Session** | **Location:** Leros island, Greece, Crithoni's Paradise 4\* Hotel

11:00–11:30

#### Measuring forward dijet at the LHC as a probe for saturation using a full impact parameter dependent TMDs

##### Speaker

Federico Deganutti

11:30–12:00

#### Incoherent diffractive dijet production in electron DIS off large nuclei

##### Speaker

Dionysios Triantafyllopoulos

12:00–12:30

#### Discussion: BFKL, saturation

##### Speakers

Dionysios Triantafyllopoulos, Edmond Iancu, Renaud BOUSSARIE

12:30
