

Phenomenology 2023 Symposium

Monday 8 May 2023

BSM IV (16:30 - 18:45)

-Conveners: Xerxes Tata

time	[id] title	presenter
16:30	[62] Vectorlike Fermions as Portals into Higgs Vacuum Stability	STEUDTNER, Tom
16:45	[40] Cosmological gravitational particle production of massive spin-2 particles	LING, Siyang
17:00	[88] Anomaly Mediated Supersymmetry Breaking for Chiral Gauge Theories	SUTER, Bethany
17:15	[86] FIMP Dark matter from Flavor models	CHAKDAR, Shreyashi
17:30	[92] New Horizons in the Holographic Phase Transition	SAMBASIVAM, Bharath
17:45	[89] Mass-varying gauge boson that couples to the dark energy field	YI, Jaeok
18:00	[179] What Can Generalized Symmetries Do For You	KOREN, Seth
18:15	[150] Vector boson dark matter in a classically conformal U(1) extension of the Standard Model	BAULES, Victor
18:30	[63] EFT for Heavy Dark Matter of Arbitrary Spin	Dr KVEDARAITE, Sandra
