

Canonical: using Indico at Tech Conferences

Monday 20 March 2023 11:40 (10 minutes)

Indico is an exceptional events management platform developed at CERN, with a strong focus on scientific events. However, its versatility makes it suitable for running community-focused open source events as well. At Canonical, we successfully used Indico to host the Ubuntu Summit 2022. During our presentation, we will discuss the essential aspects of our Indico setup, the customizations we made to meet our unique needs, and a command-line tool we developed to save time and address certain shortcomings.

Type of talk

Presenter: KEWISCH, Philipp (Canonical)

Session Classification: Monday Morning Session
