

GridPP Ops 13/12/22

Attending: Matt, Gerard H, Vip, Jose, Sam, Raul, Pete C, Steven S, Alex R, Dan T, Dwayne, Tim C, Winnie, Duncan R, Emanuele, JamesW, Linda, Darren M, Tom B, Dan W, Rob C, Daniela, Wenlong, Gordon (joined late)

Apologies: DavidC

Urgent Business

None

Actions from previous meetings.

None

VO Updates

ATLAS (James):

- Cern: [OTG0074642](#) Applying a reduction in the amount of (lxbatch) batch resources provided from ~15th Dec to March for power savings
- RAL
 - Took time to recover compute slots after the Echo downtime (ATLAS only VO that drained beforehand); also currently with very few running idle jobs.
 - Antares:
 - Potential issue with FTS transfers using “multistream” flags; but spotted and fixed in Antares TPC almost instantly
- T2
 - [GGUS:159892 ECDF_CLOUD](#) Timeouts observed on stage-in
 - [GGUS:159792 Glasgow](#) Open ticket on transfer timeouts (several jobs simultaneously reading the same file)
 - LANCS: Issue over weekend with XRootD Servers failing; did CMSD do anything useful ?
 - QMUL: Transfer issues on Sunday. But now appears ok.

CMS (Daniela):

Note from the T2 support meeting:

“Important for sites: the SAM tests will stop writing to /store/unmerged/SAM but to /store/temp/user instead. Many sites don’t allow write access to the latter from the SAM account, so please check that the SAM account can write there like any other CMS account.”

Not sure if that is actually a problem, but it’s worth checking.

[monit link](#)

LHCb: (Mark/Alexander):

RAL:

- Data challenge repeat
 - Writing part started today, reading part will be next year
- [Problem](#) with accessing one particular file
 - It was impossible to copy the file in reasonable time. Probably it was a temporary performance issue.
- Long lasting issues:
 - [Slow stats](#)
 - [Deletion problems](#)
 - Timeout increase was proposed
 - [Vector read](#)
 - Testing of different patches is ongoing

T2:

- [Issue](#) with FTS transfers to Queen Mary University
 - solved
- [Problem](#) with pilot submission at the University of Sheffield
- [Migration to ceph](#) is ongoing at the University of Glasgow

“Other” VOs:

DUNE (Wenlong):

Links: [glideInWMS configuration for the different sites](#)

[SAM tests](#)

[Monit link for history](#)

CRIC: <https://dune-cric.cern.ch/core/experimentsite/list/>

[Storage monitoring site](#)

[Job efficiency monitoring site](#)
[DUNE job status](#)

- Workflow tests:
<https://wfs.dune.hep.ac.uk/dashboard/?method=wtf-results>

NTR

SKA:

NTR

Pete C notes that SKARC effort will ramp up in 2023.

LSST/Rubin:

Work is ongoing at Lancaster getting jobs running.

Other VOs:

Ligo: A weird ticket landed at Lancaster:

https://ggus.eu/index.php?mode=ticket_info&ticket_id=159810

This has been solved for Lancs and advice given to the submitter to submit new tickets for the other sites affected.

Jose notices problems on farm after virgo (i.e. ligo VO) jobs. This left cvmfs in a corrupted state that broke the WNs (cvmfs repo couldn't be mounted).

This has not been seen elsewhere (at least recently).

General Updates/Discussion

Change to the "Recommended Distro" from CERN and Fermilab. Alma (9) is the winner:

<https://news.fnal.gov/2022/12/fermilab-cern-recommendation-for-linux-distribution/>

Tom B reassures us that 8 is fine. CERN still haven't officially made a statement yet. We all note that 9 is not baked enough yet.

Meeting Updates

WLCG Ops Coordination last week:

<https://twiki.cern.ch/twiki/bin/view/LCG/WLCGOpsMinutes221201>

EGI Ops meeting yesterday:

<https://confluence.egi.eu/display/EGIBG/2022-12-12+notes>

Research Network Engineering meeting last Friday (9th) [which Matt gave a talk at!]

GDB this week: <https://indico.cern.ch/event/1096037/>
(good chance that it will change to add in a recommended OS talk).

IRIS F2F next month/year. 12th-13th Jan at the Royal Observatory, Edinburgh:
<https://indico.ph.qmul.ac.uk/indico/conferenceDisplay.py?confId=1593>
with a IRIS Security Workshop the day before:
<https://indico.ph.qmul.ac.uk/indico/conferenceDisplay.py?confId=1608> (currently a placeholder, the event will start in the morning).

Technical Meeting (in January probably) on power saving.

Sam reminds people to please let him know if you get accepted to CHEP (and let him know what sort of acceptance it was).

Tier 1 Status

The Echo patching/reboot intervention completed successfully on 8/12/22.

The Tier-1 change freeze is now in place until the new year (3rd January 2023). In practice critical security patches will be implemented as required as will any necessary intervention needed to return a service to production status. However, it is anticipated that by not allowing any “mucking about” will ensure a smooth production service over the Christmas period.

Tier-1 Network upgrade (latest update on top)

29/11/22 - Tom B has test firewalls for WNs, one step closer to them being on LHCONE

22/11/22 - hopefully some updates this week. Central core hardware routers *have* been replaced.

13-09-22 - Tom B notes a problem with host firewalls on LHCONE nodes.

09-09-22 - IPv6 Traffic now enabled on the super spine.

02-08-22 - intention to make 2022 WNs (rocky 8 gen) hope to put these on lhcone.

17-05-22 Technically joined the LHCONE but at the moment it has only one host (the new perfSonar box). Currently we have resource checking and conforming routing between endpoints and IPV6 allocations.

05-04-2022 Resolution of new storage node access and central security work delayed LHCONE activity. Being re-timetabled.

Security Brief

New home for advisories: <https://advisories.egi.eu>

- Operational update [standing item]
- Pakiti status - should be working
- Site Security Survey
 - (good place to note things like Carbon Black@Bristol)

<https://www.jisc.ac.uk/get-involved/cyber-security-community-group>

AAI

- <https://twiki.cern.ch/twiki/bin/view/LCG/ResourceTrustEvolution>

In particular, if you would like to join the discussion the egroup is “wlcg-resource-trust-evolution”

Auth Working Group Twiki: <https://twiki.cern.ch/twiki/bin/view/LCG/WLCGAuthorizationWG>

Indico Category: <https://indico.cern.ch/category/68/>

Mailing list egroup: project-lcg-authz

Note - AuthZ meetings moved to fortnightly Friday's 14-15:00 UK.

[perfSONAR issues](#)

No data:

RAL-LCG2: GGUS: https://ggus.eu/?mode=ticket_info&ticket_id=158746

cta-ps01-bw.scd.rl.ac.uk: no meshes configured: easy to fix. Good inbound rates to cta-ps01-bw.scd.rl.ac.uk over IPv4 (up to ~ 17 Gb/s):

<https://psmad.opensciencegrid.org/maddash-webui/details.cgi?uri=/maddash/grids/UK+Mesh>

[+Config+-+UK+IPv4+Bandwidth+-+Throughput/ps-london-bw.ja.net/cta-ps01-bw.scd.rl.ac.uk/Th
roughput](https://psetf.opensciencegrid.org/etf/check_mk/index.py?start_url=%2Fetf%2Fcheck_mk%2Fview.py%3Fhost%3Dt1-ps01-bw.gridpp.rl.ac.uk%26site%3Detf%26view_name%3Dhost)

t1-ps01-bw.gridpp.rl.ac.uk : No results, unable to connect over port 443: connect to address

t1-ps01-bw.gridpp.rl.ac.uk and port 443: Connection timed out

[https://psetf.opensciencegrid.org/etf/check_mk/index.py?start_url=%2Fetf%2Fcheck_mk%2Fvi
ew.py%3Fhost%3Dt1-ps01-bw.gridpp.rl.ac.uk%26site%3Detf%26view_name%3Dhost](https://psetf.opensciencegrid.org/etf/check_mk/index.py?start_url=%2Fetf%2Fcheck_mk%2Fview.py%3Fhost%3Dt1-ps01-bw.gridpp.rl.ac.uk%26site%3Detf%26view_name%3Dhost)

RALPPD: no IPv6 connectivity to port 443 amongst other things

[https://psetf.opensciencegrid.org/etf/check_mk/view.py?host=hep-ps-bw-bp.pp.rl.ac.uk&site=
etf&view_name=host](https://psetf.opensciencegrid.org/etf/check_mk/view.py?host=hep-ps-bw-bp.pp.rl.ac.uk&site=etf&view_name=host)

Liverpool: GGUS: https://ggus.eu/?mode=ticket_info&ticket_id=159261

CRITICAL - Connection failed (500 Server Error: Internal Server Error) and CRITICAL - pscheduler
not enabled/running.

–Note Rob is off for Christmas.

Sheffield: GGUS: https://ggus.eu/index.php?mode=ticket_info&ticket_id=159903

[https://psetf.opensciencegrid.org/etf/check_mk/view.py?host=lcgperf.shef.ac.uk&site=etf&vie
w_name=host](https://psetf.opensciencegrid.org/etf/check_mk/view.py?host=lcgperf.shef.ac.uk&site=etf&view_name=host)

IPv6 issues: connect to address lcgperf.shef.ac.uk and port 443: Connection timed out

→ probably related to https://ggus.eu/index.php?mode=ticket_info&ticket_id=159813

Imperial: No outbound latency tests apart from to Jisc London.

RHUL: GGUS: https://ggus.eu/?mode=ticket_info&ticket_id=158756

Poor outbound throughput rates possibly caused by the fact that there are different routes
in/out.

Durham: GGUS ticket: https://ggus.eu/index.php?mode=ticket_info&ticket_id=159902

[https://psetf.opensciencegrid.org/etf/check_mk/view.py?host=perfsonar.dur.scotgrid.ac.uk&sit
e=etf&view_name=host](https://psetf.opensciencegrid.org/etf/check_mk/view.py?host=perfsonar.dur.scotgrid.ac.uk&site=etf&view_name=host)

IPv6 issues?: connect to address perfsonar.dur.scotgrid.ac.uk and port 443: Connection timed
out

Performance issues

UCL: < 1Gb/s over IPv6 – 1 G limit somewhere?

Sussex: < 1Gb/s over IPv4 and IPv6 – 1 G limit somewhere?

Glasgow: < 1Gb/s over IPv6 (apart from Imperial..) – 1 G limit somewhere?

QMUL: Relatively low inbound rates (< 4 Gb/s) and loss most likely caused by congestion on 10G
link

→ Should be fixed Thursday.

RAL-LCG2: lcgps01: high (~1%) packet loss outbound over IPv6, but not to RALPPD

<https://psmad.opensciencegrid.org/maddash-webui/details.cgi?uri=/maddash/grids/UK+Mesh+Config+-+UK+IPv6+Latency+-+Loss/lcgps01.gridpp.rl.ac.uk/ps-london-lat.ja.net/Packet+Loss>

<https://psmad.opensciencegrid.org/maddash-webui/details.cgi?uri=/maddash/grids/UK+Mesh+Config+-+UK+IPv6+Latency+-+Loss/lcgps01.gridpp.rl.ac.uk/hep-ps-lt-bp.pp.rl.ac.uk/Packet+Loss>

ECDF: some outbound loss IPv4 and IPv6

Imperial: IPv4 outbound path number = 3-4, IPv6 outbound path number = 4

Lancaster: IPv4 outbound path number = 1-4

Glasgow: IPv4 outbound path number = 4-6

–Note that at Glasgow this is by design/expected.

–Change of colour scheme?

–Don't interpret red==bad.

Bristol: IPv4/6 outbound path number = 2

Oxford: IPv4 outbound path number = 4, IPv6 outbound path number = 2

Important to give Tim/Duncan feedback now ahead of 5 release (there's a European PS dev meeting next week).

Most common issue is port 443 over Ipv6 - please can sites check this.

Storage and Data Management News

Minutes: [GridPP Storage](#)

Reminder: Storage Meeting is now @ 1030 [not 10am] to make it slightly easier for everyone to attend.

Last storage meeting of the year tomorrow. (We can talk a bit about Lancs' "live bug testing" for xrootd...)

Technical Update

(to include any Token News, Data Challenge work, "New" OS experiences)

Standing subjects:

-ESCAPE credentials and use of tokens

-"Carbon Black" @ Bristol and similar technologies elsewhere

-ARGUS concerns.

NTR

Duty Report

Dashboard looks reasonably tidy, sadly no last minute issues we can clean up easily.

Tickets

[UK GGUS tickets](#)

46 Open UK tickets

Please can any loose end tickets be as wrapped up as possible for Christmas

This CMS xroot ticket for Brunel came in at the weekend:

https://ggus.eu/index.php?mode=ticket_info&ticket_id=159883

Fixed, but I haven't closed it (Raul)

I think these Glasgow DPM tickets can be blanket closed (sorry for nagging):

https://ggus.eu/index.php?mode=ticket_info&ticket_id=159276

https://ggus.eu/index.php?mode=ticket_info&ticket_id=158833

https://ggus.eu/index.php?mode=ticket_info&ticket_id=156049

https://ggus.eu/index.php?mode=ticket_info&ticket_id=148396

Please can this RAL test ticket have something done with it 😊

https://ggus.eu/index.php?mode=ticket_info&ticket_id=159506

especially as you have this new test one:

https://ggus.eu/index.php?mode=ticket_info&ticket_id=159845
