

Robust Optical Clocks for International Timescales (ROCIT)

Wednesday 18 October 2023 09:30 (30 minutes)

The recently concluded collaborative European project “Robust optical clocks for international timescales” (ROCIT) tackled some of the key challenges on the roadmap towards a redefinition of the second. The overall aim was to bring European optical clocks to the stage where they can contribute regularly to International Atomic Time as secondary representations of the second.
