# EOS for ALICE O2 - Evolution and challenges (2022 - 2023)

*Tuesday 25 April 2023 16:40 (20 minutes)*

2022 was a critical year which had some operational impact on all systems and services. In this talk we are going to present a few operational decisions, their implication on the EOS storage for the ALICE data taking and how we implemented mitigations by bringing improvements to the operations model as well as to the software stack.
