

EOS 2023 Workshop

Contribution ID: 28

Type: 10 Minutes

EOS at the Fermilab LHC Physics Center

Tuesday 25 April 2023 16:00 (10 minutes)

Fermilab has been running an EOS instance since testing began in June 2012. By May 2013, before becoming production storage, there was 600TB allocated for EOS. Today, there is approximately 13PB of storage available in the EOS instance.

The LPC cluster is a 4500-core user analysis cluster with 13 PB of EOS storage. The LPC cluster supports several hundred active CMS users at any given time.

An update of our current experiences and challenges running an EOS instance for use by the Fermilab LHC Physics Center (LPC) computing cluster. Planning the upgrade to EOS 5 and moving to Almalinux before EOL for SL7.

Author: SZKOLA, Dan (Fermi National Accelerator Lab. (US))

Presenter: SZKOLA, Dan (Fermi National Accelerator Lab. (US))

Session Classification: EOS Operation & Sites

Track Classification: Sites and Deployments
