

808 nm Laser irradiated upconversion nanoparticle coated with antimony shell for bioimaging and photothermal therapy in vitro

Abstract Category

Materials Physics

Primary author: Dr DIBABA, Solomon Tiruneh (Applied Physics Department, School of Applied Natural Science, Adama Science and Technology University, Adama 1888, Ethiopia)

Co-authors: Prof. WEI, Ren (Physics Department, International Centre for Quantum and Molecular Structures, Shanghai University, Shanghai 200444, China); Prof. LINING, Sun (Research Center of Nano Science and Technology, College of Sciences, Shanghai University, Shanghai 200444, China)

Presenter: Dr DIBABA, Solomon Tiruneh (Applied Physics Department, School of Applied Natural Science, Adama Science and Technology University, Adama 1888, Ethiopia)

Track Classification: Physics Research
