

A brief story tale of an ASP alumnus

Friday, 29 September 2023 13:45 (10 minutes)

Since my undergraduate studies, I immersed myself in the fascinating realm of quantum mechanics and particle physics. I delved into the theory of quantum fields, studying the behavior of particles at the smallest scales. My journey as a particle physicist became enriched and an exhilarating adventure after my participation in the African School of Physics in 2012 in Ghana. Today I will briefly go through my journey, which I hope will give motivation and inspiration to the youngest generation.

Presenter: BOYE, Diallo (Brookhaven National Laboratory)

Session Classification: Parallel Session on "Early Career African Physicists"
