

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

# Gender Gap in Science

There is a significant gender gap in Physics globally. Many factors contribute to the low number of female physicists: limited access to education, poverty, social and cultural factors, the lack of female role models and mentors. The scarcity of female researchers means a huge fraction of the country's potential for scientific progress is wasted.

To meet UN's Sustainable  
Development Goals, Pakistan  
needs to empower its female  
population.

# Dedicated to all our moms

All the organizing team would like to dedicate this event to our mothers. Only due to our mother's efforts, we are able to organize such an event today. From our childhood to adulthood, they dedicated their life to us; from preparing school meals to giving lunch for the office, saving from dad's punishment to relieving the stress of adolescence.

Mankind's Greatest Masterpieces - James Webb Space telescope

Speaker: Roshaan Bukhari

Career in Space Science

Speaker: Yumna Majeed

Three Great Achievements of Science

Speaker: Dr. Pervaiz Hoodbouy

Tea Break - 11:25 AM

# Schedule

# Schedule

Maqsad - Online learning Platform (Sponsor talk)

Building Blocks of the Universe

Speaker: Dr. Shabana Nisar

Medical Physics: A broad spectrum of Career

Speaker: Ms Zainab Ronaque
