Conceptual Design and Implementation of a Prototype Search Application using the Open Web Index

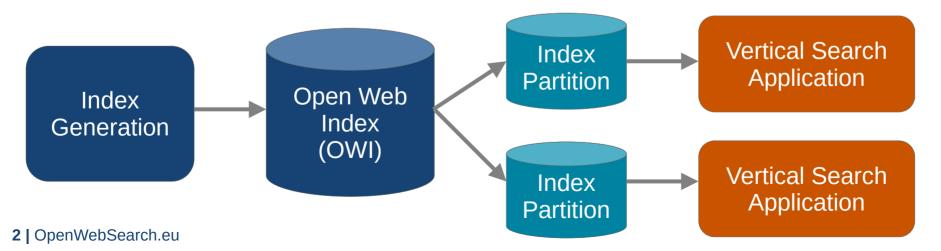

Alexander Nussbaumer, Rohit Kaushik, Gijs Hendriksen, Sebastian Gürtl, Christian Gütl

5th International Open Search Symposium (OSSYM) 4-6 October 2023

Vertical Search Engines in OWS

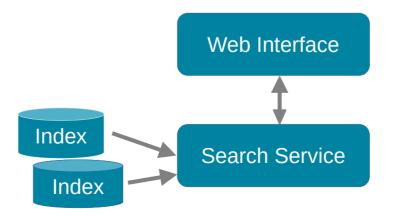

- Vertical Search Engines serve special purposes, topics, or domains, e.g. product search
- Search applications are a key concept in OpenWebSearch.eu
- Based on Open Web Index and index partitions

Prototype Search Application

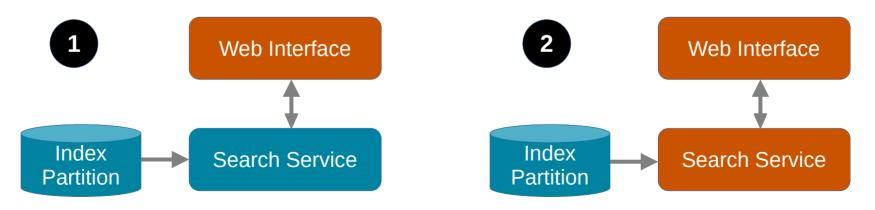

- Minimal implementation of a OWS vertical search engine
 - Index partitions in reasonable size on a local server
 - Search service that searchers the index and provides REST API
 - Web interface that allows end-users specific search

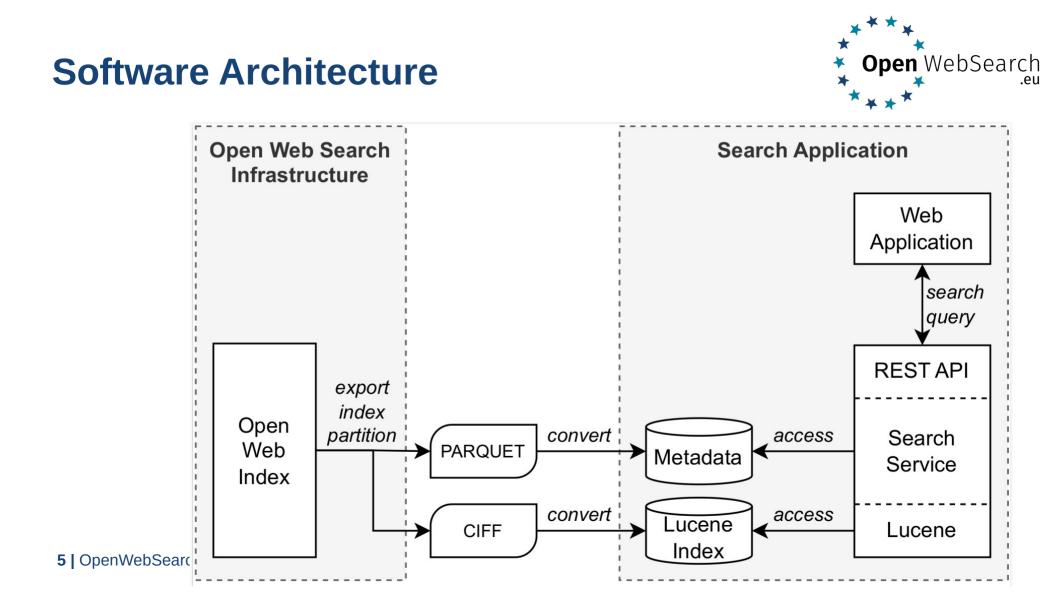

Prototype Search Application

- Guides the development of a OWS search application
 - Using the search service and development of a web interface (1)
 - Using the concept and development of the whole application (2)

Index Partition: CIFF and PARQUET

- CIFF: Index exchange format; inverted index
- Parquet: Tabluar format

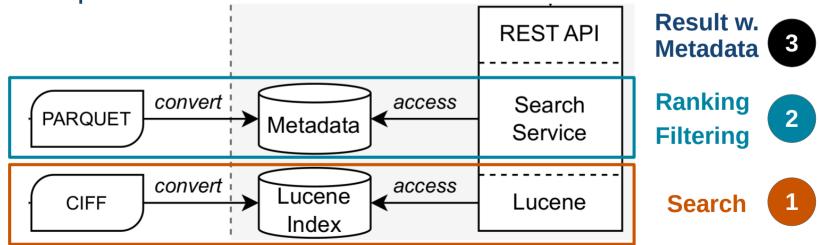

Term	List of (Document, Frequen	су)				
Term 1	(docID A, 1) (docID B, 3) (doc	ID C, 1)				Parquet
Term 2	(docID D,2)	Document	Lang	Full text	WARC date	
Term 3	(docID E, 4) (docID F, 2)	docID A	en	text	2023-07-01	
Term 4	(docID H, 2) (docID I, 1)	docID B	de	text	2023-07-01	
		docID C	de	text	2023-07-01	
6 OpenWe	ebSearch.eu	docID D	en	text	2023-07-01	

CIFF

Search Process

- CIFF file is converted to a Lucene index that can be searched with the Lucene library
- Search result is filtered and ranked using metadata coming from the Parquet file

Demonstration 1: Basic Search

- Simple web interface to the Search Service
- Operates two indices
- Performs ranking and filtering
- Displays metadata

Search term:	Graz	Search		
Index:	Ranking:	Language filter:	Limit:	
O default	⊖ default	 default 	O default	
O Demo Graz	O ascending	O English	O 10 items	
O Demo Snaps	hot o descending	O German	● 50 items	
			O 1,000,000 items

TransCoding - The Book

Artistic research, and with it the process of doing art and the artwork itself, are at the heart of this investigation. Ear that reason. I provide as an augmented way of reading this complementary website to

Demonstration 2: Sightseeing Application

- Integration into existing Sightseeing application Spots
- Clicking on a sightseeing marker triggers a search with the title as search term

Open WebSearch

Search result for term: Opera Building

Best attractions in Graz

The cafe, opened in a hotel with the same name, can be called a full-fledged Austrian attraction, because it is here that they serve the real Sacher cake, cooked according to the original ancient recipe. Keep in mind that there are always a lot of vi

Opera House Graz

Something fascinating about Graz - the interplay of modernism and tradition - is illustrated by the sculpture "light sword" next to the opera house. It was originally made for the festival "steirischer herbst" in 1992. To celebrate the 500th annivers

Graz Opera

Past general music directors (GMD) of the company have included Niksa Bareza (1981-1990), Philippe_Jordan (2001-2004) _Johannes Eritzsch (2006-2013) and Dirk Kaftan (2013-2017) I7J In

Create You Own Search Application!

- Code available on GitLab in public area
- Follow instructions in Readme file to download and start service
- Try out REST API in your browser
- Try out Web interface in your web server
- Use the code to create you own application

https://opencode.it4i.eu/open websearcheu-public/prototyp e-search-application

Next Steps

- CIFF and Parquet file Management
 - Alignment CIFF and Parquet files with OWS infrastructure
 - Merging multiple CIFF files and related Parquet files
 - Performance tests with large index partitions
- Development environment for creation search application
 - Depending on feature requests from Hackathons, OWS Applications, 3rd party applications, etc.
- Ethical and legal implications
