Phenomenology of flavoured 3HDMs

Saturday 15 July 2023 14:00 (30 minutes)

I will overview our recent advances in studies of various phenomenological implications of multi-Higgs extensions of the Standard Model constrained by additional symmetries. A particular focus would be on 3HDMs, with some of their basic implications on Higgs and flavour physics.

Presenter: PASECHNIK, Roman (Lund university)

Session Classification: Afternoon session
