## Status of heavy charged Higgs boson searches at the LHC

*Friday 24 February 2023 17:10 (20 minutes)*

In this talk, I will discuss the status of heavy charged Higgs boson searches at the LHC focusing on the 2-Higgs-doublet model. I also discuss the potential of using top quark properties for both the discovery and the characterization of charged Higgs bosons.

**Presenter:** Dr JUEID, Adil (IBS CTPU)

**Session Classification:** Flavor
