

“Physics with PHENIX and ALICE” Heavy Ion Meeting 2007-10

This meeting looks more like Japan Korea joint heavy ion meeting (“JK-HIM”) by having 4 Japanese speakers. So, it would be interesting to talk about the similarities between Japanese and Korean.

**Both people cook the rice exactly same way.
(same stickiness with short and fat rice)**

**Both people like to eat fish, especially raw fish
(sashimi, sushi)**

**Both people use Chinese character even
though they have their own languages
(兩國民漢子使用)**

Both people live in the same time zone
(同一時間帶)

For this meeting,

The number of speakers is the same (4+1) from two countries.

The location (JeJu) is about the same distance from two counties.

Staying at the same hotel and having dinner, breakfast, and lunch together so that we have a chance to be even more closer.

I hope this meeting becomes a memorable one for everybody.
