Teachers' learning needs

Q. I think I have achieved adequate qualifications to introduce the General Theory of Relativity during:

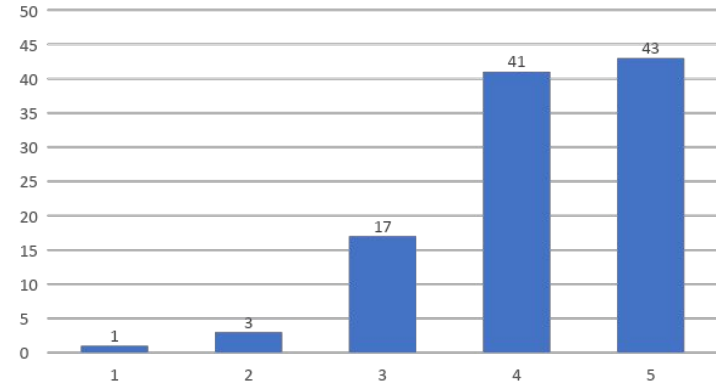

Training Project (see A. Piccione's talk about 100 teachers, G. Scalzo Graduation Thesis)

Teachers' attitudes towards GR

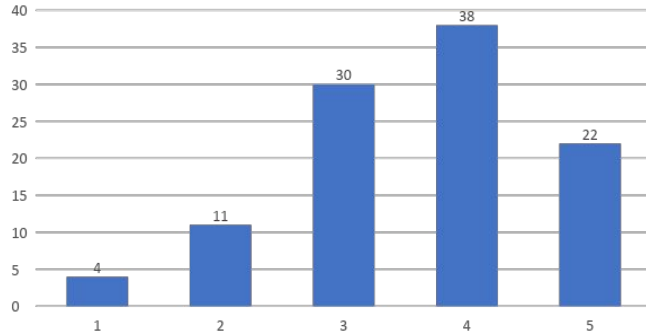

I consider it useful to improve my personal knowledge of General Relativity

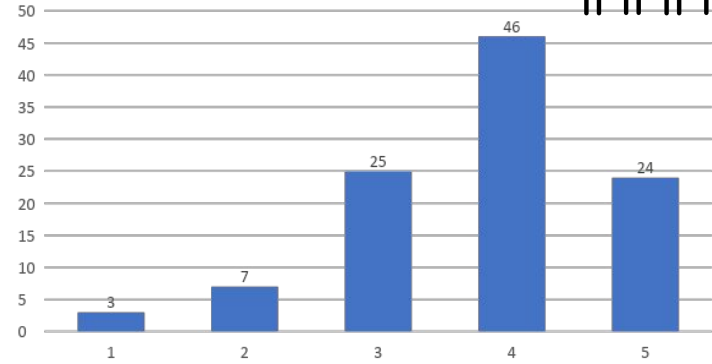

I think it is important to dedicate some lessons to the theory of General Relativity

1 = completely disagree 2 = disagree 3 = neutral 4 = agreement 5 = complete agreement

Teachers' attitudes towards GR

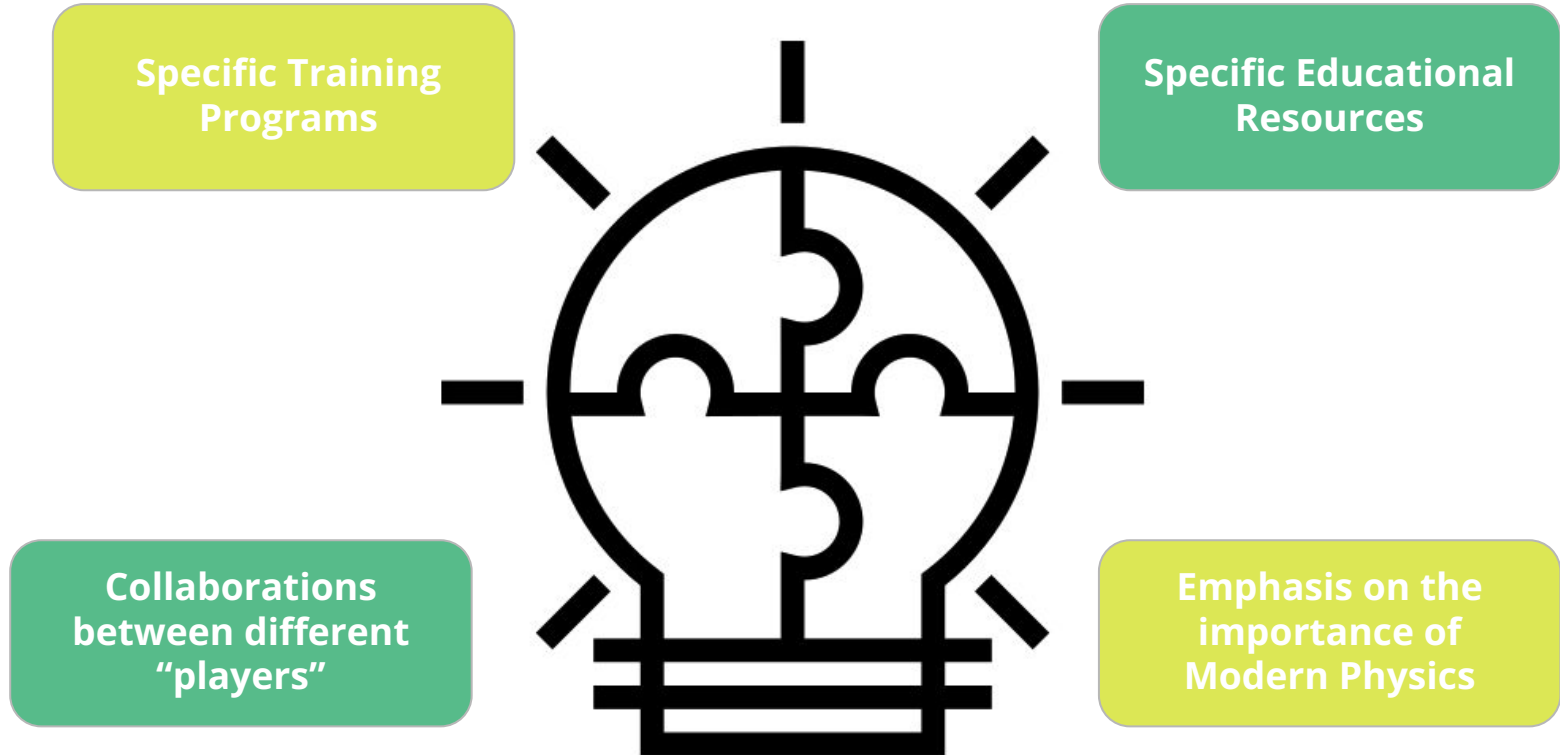

I believe that students in the final year are in possession of good tools for a first basic understanding of General Relativity

I consider it useful to introduce the theory of General Relativity, despite the fact that the time available, in relation to the number of topics to be covered, is often limited

1 = completely disagree 2 = disagree 3 = neutral 4 = agreement 5 = complete agreement

Synergy
