

# EMI Documentation

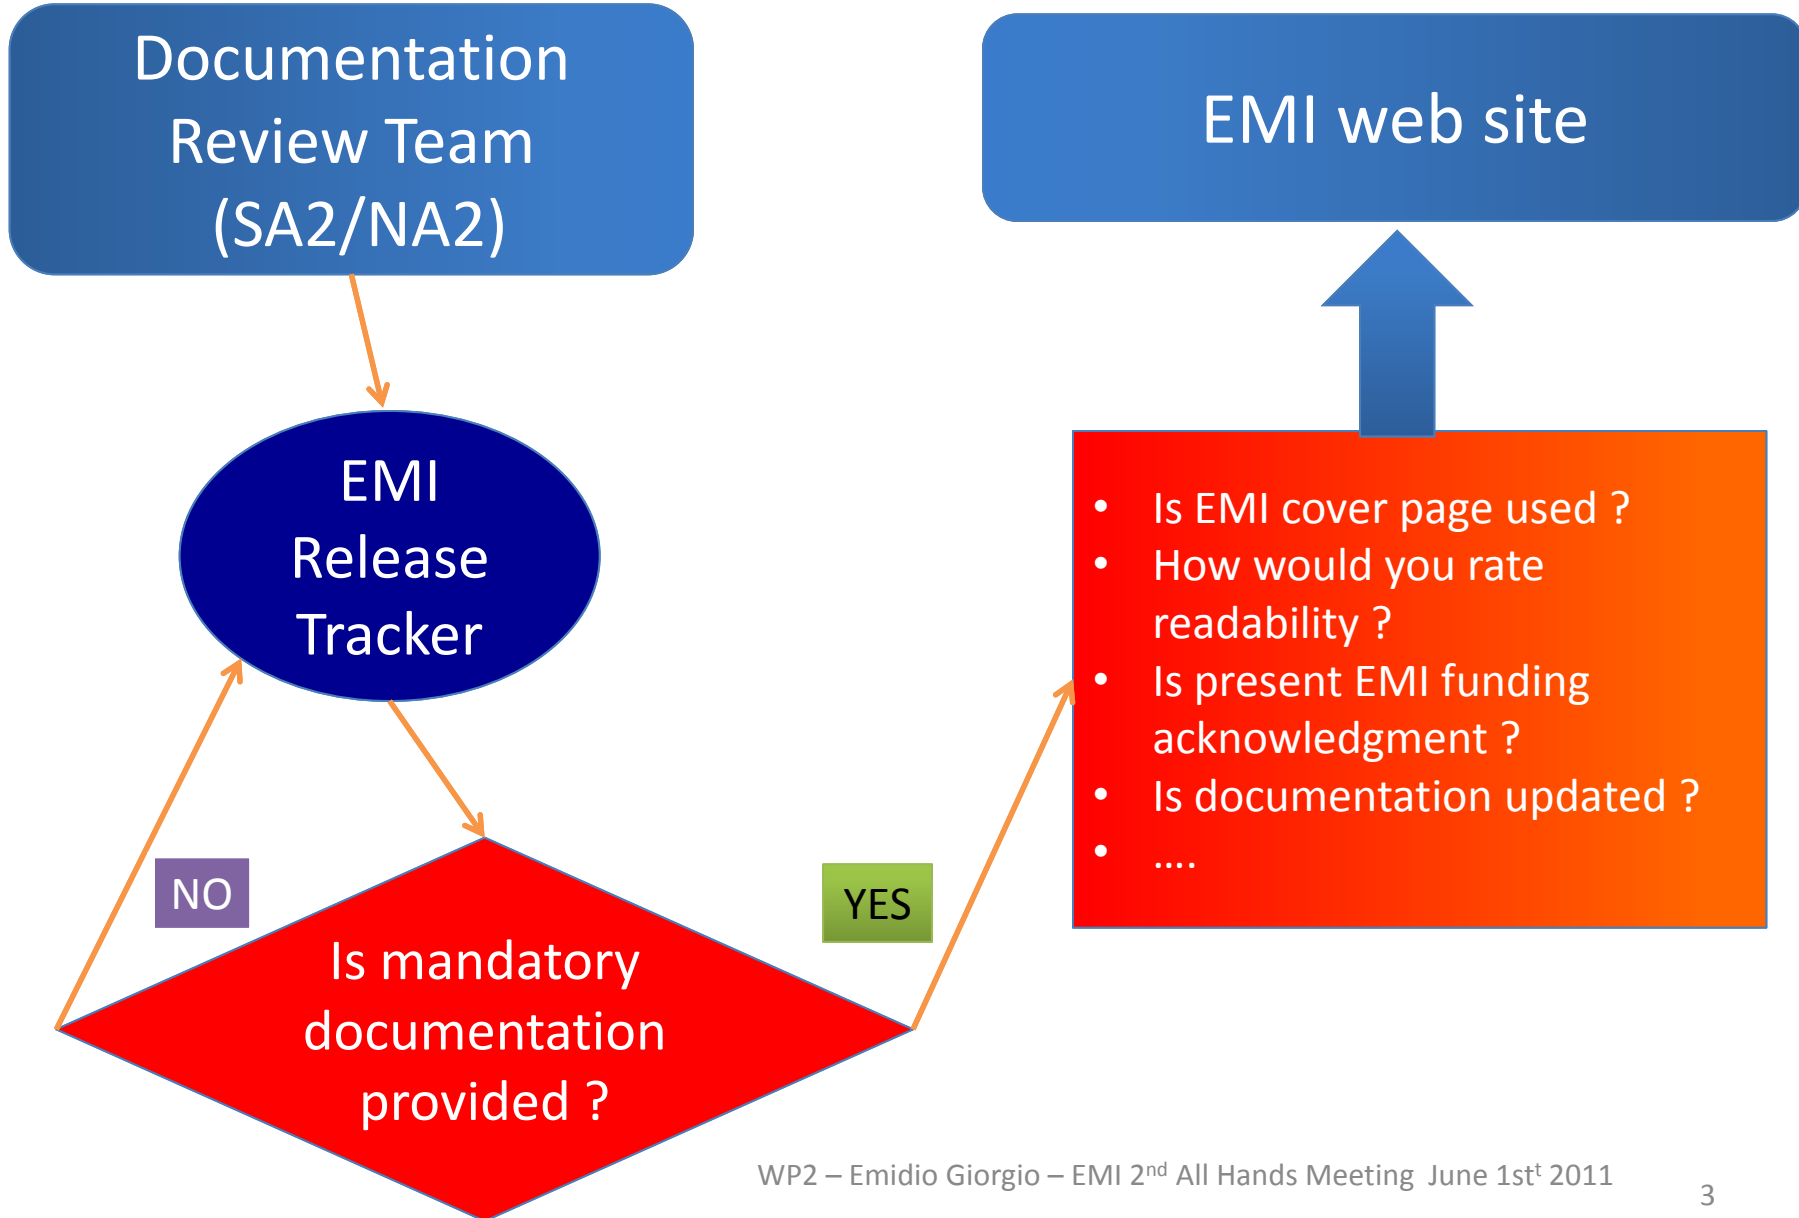

Emidio Giorgio (INFN Catania)  
NA2 Leader

2<sup>nd</sup> All Hands Meeting  
May 31th, Lünd

# Overview

- The Documentation review process
- Documentation on public web site
- What to improve
- Discussion

# The Documentation Review process

# Issues

- In some cases mandatory doc missing
- Multiform documentation formats
  - Need of reusing existing docs
- Review process started too late
  - documentation quality checked only on surface

# Documentation on EMI web site

- <http://www.eu-emi.eu/documentation>
  - [New version here](#)
- <http://www.eu-emi.eu/kebnekaise-products>
- Differences
  - **Documentation** is a section collecting all documentation items, categorized by type, area, format
    - There might be cross-product items (e.g. generic Install. Guide).
  - **kebnekaise-products** is a collection of all release products : for each of them, it's reported all information provided by PT in release tracker

# What to improve ?

- Member of documentation review team should be informed of every documentation update
  - add team members to tracker items ?
- Documentation review process need to start in time
  - 1 month before ?
- Need to fix exactly acceptance criteria and actions to take when they are not matched

**Thank you**

EMI is partially funded by the European Commission under Grant Agreement INFSO-RI-261611
