Particle Therapy MasterClass: NISER, Jatni, Odisha, India

Report of Contributions

Particle Therapy $\cdots \ /$ Report of Contributions

Welcome to PTMC-2023

Contribution ID: 1

Type: not specified

Welcome to PTMC-2023

Friday 31 March 2023 10:00 (10 minutes)

Presenter: Prof. MOHANTY, Bedangadas (NISER, CMRP)

Particle Therapy · · · / Report of Contributions

Introduction to particle accelerat \cdots

Contribution ID: 2

Type: not specified

Introduction to particle accelerators and its medical applications

Friday 31 March 2023 12:00 (45 minutes)

Presenter: Dr KASHYAP, Varchaswi K S (NISER)

Particle Therapy \cdots / Report of Contributions

Videos/animation on accelerators

Contribution ID: 3

Type: not specified

Videos/animation on accelerators

Friday 31 March 2023 12:45 (15 minutes)

Presenter: Dr KASHYAP, Varchaswi K S (NISER)

Contribution ID: 4

Type: not specified

Introduction to Particle Therapy

Friday 31 March 2023 10:15 (1 hour)

Proton therapy is a form of radiation therapy that utilizes protons to target cancerous cells with high levels of precision. The technology works by accelerating protons to high speeds and then directing them towards tumors, where they release their energy and destroy cancer cells. Proton therapy has become increasingly popular due to its ability to minimize damage to healthy tissues and reduce the risk of long-term side effects commonly associated with traditional radiation therapy. The process involves precise targeting, imaging, and planning, and typically requires a team of specialized healthcare professionals. Proton therapy is particularly useful for treating cancers of the brain, spine, and prostate, among others. Proton therapy is a rapidly evolving technology, with new techniques and technologies continually being developed to enhance its effectiveness and minimize side effects. One such technology is pencil beam scanning (PBS), which is a type of proton therapy that allows for more precise targeting of tumors. Overall, these different types of proton therapy technologies offer patients and clinicians greater control and precision in the treatment of cancer, while reducing the risk of side effects and damage to surrounding healthy tissues. Despite its many benefits, proton therapy is still a relatively new technology, and ongoing research is focused on improving its effectiveness, accessibility, and affordability.

Presenter: Dr NOUFAL, M.P. (Apollo Proton cancer centre, Chennai)

Videos/animation on Particle Therapy

Friday 31 March 2023 11:15 (30 minutes)

Presenter: TAMBAVE, Ganesh Jagannath (National Institute of Science Education and Research (NISER) (IN))

Particle Therapy $\cdots \ /$ Report of Contributions

Introduction to matRad software

Contribution ID: 6

Type: not specified

Introduction to matRad software

Friday 31 March 2023 14:30 (30 minutes)

Presenter: Mr MISHRA, lalatendu (NISER, CMRP)

Particle Therapy · · · / Report of Contributions

Hands on session and exercises

Contribution ID: 7

Type: not specified

Hands on session and exercises

Friday 31 March 2023 15:00 (1h 30m)

Presenters: TAMBAVE, Ganesh Jagannath (National Institute of Science Education and Research (NISER) (IN)); Mr MISHRA, lalatendu (NISER, CMRP)

Particle Therapy \cdots / Report of Contributions

Quiz

Contribution ID: 8

Type: not specified

Quiz

Friday 31 March 2023 16:30 (30 minutes)

Presenter: TAMBAVE, Ganesh (NISER, CMRP)
