

DRD1 Funding (proposal)

With the intention to keep lightweight [RD51 like MoU](#) and flexibility

Common Fund(s) - very limited fixed contribution by each institute

- common projects (blue sky) approved and reviewed by DRD1 management (matching funds)
- limited support for the electronics and software tools development
- limited support of the common facilities
- Collaboration events support (meetings, conferences, schools)

Work Packages - Institutes funds – major funding lines for strategic R&D as **identified by DRD1 (WG2)** (scientific approval)

- a formal agreement between participating institutes and DRD1 and/or host lab
- approved and co-signed by funding agencies
- scope, deliverables, work plan, resources
- coordinated internally, reported to DRD1, and reviewed by DRDC
- WG (software, electronics, ..) activities should be included when possible

Major Common Investments (material, infrastructure) - a similar mechanism to WP

M&O of Common Facilities (manpower) - in-kind contributions + WP

art. 9.3 of the MoU for the RD-51 Collaboration:

*Independently from the RD-51 Common Fund, Parties to the RD-51 Collaboration may agree amongst themselves to share costs for **common projects, such as the submission of wafer production or other procurements.***
